BrightPath Tech

Fast, affordable digital solutions

Response to RFP-2026-017: Digital Claims Processing Platform for Meridian Insurance Group (fictional)

Submitted: 2026-10-09. This is a fictional document created for a classroom project.

1. Executive Summary and Understanding of the Requirement

BrightPath Tech offers the fastest and most affordable route to a modern claims platform. We understand that Meridian wants faster claim handling and a better experience for customers, and we can deliver a working system in just five months at the lowest price in this tender.

2. Proposed Solution

We will build a modern web application using standard technologies and open APIs. Integration with Meridian's existing systems will be handled as needed during the project. The platform is hosted on a major public cloud provider and can grow with Meridian's needs.

3. Implementation Approach, Timeline and Team

Delivery takes 5 months in two phases: build (weeks 1-14) and testing with go-live (weeks 15-20). The team has six people led by a project manager. We use an agile approach and keep the customer informed through weekly emails. Risks will be managed as they arise.

4. Pricing and Assumptions

Item	Price (USD)
Build and licence	760,000
Hosting set-up	50,000
Training	30,000
Year 1 support	50,000
TOTAL	**890,000**

Prices are in US dollars.

5. Security and Compliance

We follow industry best practices for security. Data is encrypted and access is controlled by user accounts. ISO 27001 certification is in progress and expected next year.

6. Support and Experience

BrightPath Tech was founded in 2023. We have completed one pilot project for a small insurance broker. Support is available by email. References are available on request.
