NexaWorks

Predictable delivery. Dependable support.

Response to RFP-2026-017: Digital Claims Processing Platform for Meridian Insurance Group (fictional)

Submitted: 2026-10-10. This is a fictional document created for a classroom project.

1. Executive Summary and Understanding of the Requirement

NexaWorks proposes a configurable claims platform delivered through a structured, low-risk programme. Meridian's goals are shorter claim cycle times, fewer manual hand-offs and clear audit trails. We have organised our plan around these three outcomes and around Meridian's seasonal claim peaks.

2. Proposed Solution

The platform uses a modular architecture with a documented REST API. Standard connectors are included for policy administration and payments, and the cloud deployment scales automatically with demand. Performance was load tested at 2,000 transactions per second, well above Meridian's forecast peak.

3. Implementation Plan, Timeline and Team

Delivery takes 7 months in five phases with two-week sprints: Mobilisation (weeks 1-3), Design (weeks 4-8), Build and integration (weeks 9-22), UAT (weeks 23-27) and Cutover with go-live (weeks 28-30). Hypercare lasts six weeks after go-live. A 10 percent schedule contingency is held by the project manager.

Governance: a joint steering committee meets monthly; a RACI matrix is agreed in week 2 and dependencies on Meridian (test data, environments, subject-matter experts) are tracked weekly.

Staffing: one project manager, one scrum master, one architect, five engineers, two testers and one training lead. Risk register (top items): (1) legacy data quality - mitigation: profiling in design phase; (2) key-person dependency - mitigation: named deputies; (3) integration delays - mitigation: early sandbox and weekly integration checkpoints; (4) UAT availability - mitigation: agreed testing calendar; (5) scope growth - mitigation: change control board. Training is delivered before UAT.

4. Pricing and Assumptions

Item	Price (USD)
Platform licence and build	820,000
Integration	130,000
Training	35,000
Hypercare (6 weeks)	40,000
Year 1 support (24x7, SLA)	95,000
TOTAL (fixed price)	**1,120,000**

Assumptions:

- Fixed price, invoiced against five milestone payments.

- Data migration for up to three source systems is included.

- Optional: additional language packs at USD 12,000 each.

- Exclusions: third-party licence fees for Meridian's identity provider.

5. Security, Compliance and Risk Controls

NexaWorks is ISO 27001 certified; a SOC 2 Type I report is available and the Type II audit is scheduled. Data is encrypted with AES-256 at rest and TLS in transit, access is role-based with multi-factor authentication, and activity is recorded in audit logs. The platform supports GDPR requirements including data subject requests.

6. Support Model, Experience and References

Our 24x7 service desk guarantees 99.9 percent uptime under the SLA. Priority 1 incidents receive a 30 minute response time with a defined escalation path. Each client has a named customer success manager and a quarterly review. Our customer satisfaction (CSAT) score is 4.6 out of 5.

NexaWorks has delivered nine similar projects for insurers and financial services clients. References: Harbour Mutual (fictional), Delta Assurance (fictional) and Crown Benefits (fictional). Onboarding and knowledge transfer are included in the price.
